B.Tech, Computer Science and Engineering - Artificial Intelligence and Machine Learning

Address : 4/113 p.nattamagalm kondalapatti salem

Summary

"Enthusiastic IT graduate seeking a position as a Junior Software Developer to utilize my programming skills, problem solving abilities, and passion for learning to contribute to innovative projects."

Education

SRM IST-Vadapalani

2027

B.Tech · Computer Science and Engineering - Artificial Intelligence and Machine Learning

CGPA - 9.08/10

NPR MATRIC HER SEC SCHOOL

2023

Class XII - TamilNadu state board · Salem

Percentage - 74%

NPR MATRIC HER SEC SCHOOL

2021

Class X - TAMIL NADU BOARD OF SECONDARY EDUCATION · Salem

Percentage - 100%

Projects

Network Anomaly Detection Project | [GitHub Repository](#)

· Python, Pandas, NumPy, Scikit-learn, Flask, Matplotlib

Machine Learning

- Developed a Machine Learning-based Network Anomaly Detection System to identify suspicious network activities and cyber threats.
- Performed data preprocessing and feature engineering on network traffic datasets using Python, Pandas, and NumPy.
- Trained and evaluated classification models to accurately distinguish normal and anomalous network behavior.
- Implemented real-time anomaly detection and visualization for effective network security monitoring.
- Improved threat detection efficiency by analyzing network patterns and generating predictive security insights.

AI-Powered Personal Financial and Budget Calculator | [GitHub Repository](#)

· Python, Pandas, NumPy, Flask

- Developed an AI-powered Personal Financial and Budget Calculator using Python, Flask, Pandas, and NumPy.
- Implemented a Linear Regression machine learning model to predict future expenses from historical spending data.
- Integrated AI-driven financial advice, risk assessment, and investment recommendations to support smarter financial planning.

Certifications

Introduction to Machine Learning

NPTEL

Secured Elite certification in Introduction to Machine Learning

Programming in Java

NPTEL

Secured Silver certification in Programming in Java

Artificial Intelligence Fundamentals

Great Learning

Introduitiion to Natural Language Processing

upGrad

Publications

PERSONALIZED LEARNING PATH RECOMMENDATION SYSTEM | [Paper](#)

IJIREEICE

- Developed a Personalized Learning Path Recommendation System that recommends suitable career domains based on students' academic, technical, and behavioral skills.
- Implemented and compared Random Forest, Decision Tree, KNN, and SVM machine learning models to predict the most appropriate learning path.
- Achieved 90% prediction accuracy using Random Forest, outperforming other models and providing reliable recommendations.
- Built an interactive system that recommends domains such as AI & ML, Data Science, Cyber Security, Web Development, and UI/UX Design based on user inputs.

Volunteering

Suderoi Social Service Trust

· Community Servies

Volunteered in community service initiatives focused on environmental sustainability, social welfare, and community development through activities such as tree plantation, cleanliness drives, food distribution, and elderly care.

Competitions

Hackathon

Participated · Anna University

Skills

Programming Languages: Python, Java, Html, Sql, Css

Tools and Technologies: vs code, MySQL, Google colab

Areas of Interest: Software Development, Machine Learning, Artificial Intelligence, Web Development, Database Management Systems

Technical Skills: Front-End Development ,Back-End Development, Database Design and Management

Languages

ENGLISH,TAMIL [Professional Working Proficiency]
